About

Product Designer with 3 years of experience, currently designing digital products at Schema for clients including Open edX, ClearDemand, and Factor AE. I work across interaction design, visual design, design systems, and AI-assisted prototyping in code, turning complex requirements into clear, intuitive experiences. I bring a strong visual communication perspective to cross-functional teams.

Experience

Schema Education *Product Designer*

April 2024 – Present

- Owned mobile Figma support project for an open-source community, restructuring the shared community file with templates, shared components, and color variables so it accurately reflects the live iOS and Android app, thereby creating single source-of-truth file
- Helped evolve the Open edX mobile design language by introducing a clearer visual progress system that reduced cognitive load and made next steps easier for learners to understand
- Remapped Paragon's legacy color styles to variables, migrated components into the new shared library, filed accessibility issues upstream, and co-presented "Shared Design Collateral" at the Open edX Conference
- Designed and built components and product modules for a retail pricing analytics platform's code-first design system, using AI-assisted design-to-code workflows, helping to close gaps between design and engineering through GitHub
- Led end-to-end product design across key experiences, defining UX, information architecture, visual direction, and scalable UI patterns while presenting design rationale to the client
- Ran Schema's part of the Open edX community mobile design meetings, planning agendas and triaging the shared file's project pages

Marketeq Digital *UX Research / Design*

May 2023 – September 2023

- Performed competitive analysis across enterprise cloud-computing platforms to identify opportunities for improving usability across users with varying levels of technical ability
- Conducted a heuristic evaluation of internal software, auditing admin panels, sidebars, navigation, and interactive features to establish requirements for a functional admin experience
- Gathered and synthesized research to identify new feature opportunities for a headless CMS platform while collaborating with a Senior Designer

Prazenta LLC *Graphic / Presentation Design*

November 2020 – August 2021

- Redesigned dynamic layouts/compositions while adhering to brand guidelines using PowerPoint, Illustrator
- Created templates that strengthened visual hierarchy and improved information flow
- Completed service specifications and prepared client deliverables to ensure consistent, industry-standard quality

Education

UI/UX Design Certification	San Diego State University	Jan 2022 – Oct 2022
BA, Design and Applied Arts	California State University Dominguez Hills	Aug 2018 – May 2020
Associate of Psychology	Grossmont Community College	Aug 2015 – May 2018

Skills

TOOLS

- Figma
- Components & Variables
- Prototyping
- FigJam
- Claude Code
- GitHub
- Notion
- Confluence
- Adobe Creative Suite
- PowerPoint

DESIGN

- Product Strategy
- Interaction Design
- Visual Design
- Design Systems
- Design Tokens & Variables
- Information Architecture
- Rapid Prototyping
- Usability Testing
- UX Research
- Accessibility (WCAG AA)
